To nowewont@earthlikeme.org

Dear Ms Batista and Mr Jermančič,

Thank you for your message of 9 January 2021 and your interest in climate action.

Climate change is one of the greatest challenges facing the world today and taking action to address it is a top priority for the European Commission. The EU has comprehensive climate and energy frameworks for 2020 and 2030 and aims to be the first climate-neutral continent by 2050.

Climate action is at the core of the European Green Deal, a strategy for an EU economy that is sustainable, cleaner, safer and healthier. For more information, please see https://ec.europa.eu/clima/policies/eu-climate-action_en.

As we work on the European Green Deal and the transition toward a climate-neutral EU, all parts of society need to work together to understand the challenges and develop the solutions, so that everyone can do their part and no one is left behind.

We are pleased to hear of your ideas. In this regard, we invite you to take part in the European Climate Pact, an EU-wide initiative launched in December 2020 to invite people, communities and organisations to participate in climate action and build a greener Europe.

For more information about the Climate Pact, please visit https://europa.eu/climate-pact/index_en.

We hope this helps.

Kind regards,

The Information & Communication Team

Subject: climate emergency solution - new world order (c)Balanced Coexistism with its base
(c)Personal Biodiversity Unit PBU

URGENT & PARAMOUNT!

Dear Ursula Von der Leyen,

President of the European Commission,

we would like ask you, to take a few minutes of your precious time, and look at the idea of a "New world order - ©Balanced Coexistism with its base ©Personal Biodiversity Unit PBU."

A month ago, we launched it in Mekelle, Tigray, on www.earthlikeme.org. We are aware that the proposals the NO WE WON'T manifesto are still in a raw state and needs cross-fields scientific support.

But with your power and wisdom, we are positive that you can lead Europe and the world on this path, and nations will follow all over the world. We believe in this idea as an opportunity for humanity to save itself and the planet, or at least take a new post Covid-19 historical path on Earth.

Thank you.

With kind regards,

Dominika Batista PhD, Architect, University Professor

Damijan Jermančič MDes, Designer, University Lecturer
